

*PRACTICE W/
VARIABLES,
THEORY AND
PROFESSOR BURREL VANN
HYPOTHESES*

LET'S GIVE SOME
EXAMPLES

WHAT IS A
VARIABLE?
AND WHAT ARE ITS ATTRIBUTES?

THEORY

SYSTEMATIC EXPLANATION FOR THE RELATIONSHIP
B/W VARIABLES

- NOT ONLY SAYS THERE ***IS*** A RELATIONSHIP
- BUT WHY THE RELATIONSHIP EXISTS

*SEX IS RELATED
TO WAGES
BECAUSE...*

HYPOTHESIS

TESTABLE STATEMENTS ABOUT RELATIONSHIP
BETWEEN SPECIFIC ATTRIBUTES WITHIN THE TWO (OR
MORE) VARIABLES

HYPOTHESIS EXAMPLE

WOMEN EARN LESS
• DIRECTIONAL
THAN MEN

(OR MEN'S AND WOMEN'S EARNINGS ARE DIFFERENT)

• NON-DIRECTIONAL

EXERCISE

VARIABLES, THEORY, HYPOTHESES

- Select two variables within your field/subfield
- Develop a theory about their relationship
- Develop at least one hypothesis about the relationship
